## Associate of Science degree

### Program and Career Description:

Most careers in engineering require a bachelor's degree or higher so the Associate of Science in Civil Engineering is designed for students wanting to complete the first two years of the bachelor's degree in a community college setting. Our students work closely with science and math faculty and have ample access to science and computer labs. Please note that this pathway requires 66 credit hours and recommends one summer semester. Students will need to meet the requirements for MATH 1910 before their freshman fall semester.

\*Students transferring to UT Knoxville should take ECON 2100 and ECON 2200 to fulfill their Social/Behavioral Science general education requirements in line with UT Knoxville's 4 hour economic requirement.

\*\*Students transferring to UT Chattanooga will need to take both Linear Algebra and a Probability/Statistics course. UT Knoxville, TSU, and University of Memphis do not require Linear Algebra, but do require a 3 hr. course in Probability/Statistics.

NOTE: Students are strongly encouraged to complete a course in Mechanics of Materials, also known as Strength of Materials, before transferring to a university.

Note: Although it is possible to complete the B.S. Degree in Civil Engineering in four semesters after earning the associates degree, students typically need five or six semesters to complete the requirements.

Note: Courses in Engineering Technology do not fulfill any of the requirements for the Area of Emphasis in Civil Engineering.

Check [www.tntransferpathway.org](http://www.tntransferpathway.org) to see which four-year institutions offer this TTP major. Students should meet with their assigned advisor to determine courses required for the university chosen.

Students and advisors should run a degree audit from myChargerNet each semester to confirm classes are applicable to the program of study.
